

OTICON CAN HELP
YOU ACHIEVE YOUR
PRACTICE GOALS:

- » **Replace** outdated equipment
- » **Upgrade** to state-of-the-art systems with more capability
- » **Equip** new professional staff or locations
- » **Expand** your diagnostic or screening services
- » **Develop** new services, such as a screening-based referral program for primary-care physicians.

People First

People First is our promise:
to empower people
to communicate freely,
interact naturally and
participate actively

OTICON PROGRAM FOR
INSTRUMENTATION AND
TECHNOLOGY UPGRADE

**State-of-the art
instrumentation is
the backbone of your
audiology practice**

- » Diagnostics
- » Intervention
- » Verification
- » Program expansion

Inspire patient confidence

Your patients want to be tested with modern instrumentation. You want the results that help you make the best recommendations.

A full range of modern diagnostic and screening tools is an important part of that experience.

Enhance your professional performance and expertise

From audiometers, to sound booths, to tympanometers, to otoacoustic emissions measurement equipment, to real-ear verification systems etc....

Audiologic instrumentation is the most frequent line item on annual budget plans.

WHY LET FUNDING BE A BARRIER?

We have a 24 month interest-free financing, and a range of programs available to help you acquire the equipment you need through licensed special equipment dealers, who can also provide recommendations, training and service as part of the package.
